You can apply for funding at your National Agency

http://ec.europa.eu/education/lifelong-learning-programme/doc1208_en.htm#autr.

Please be aware that your application must be submitted to your National Agency no later than 16th September 2011.

The 26th Conference of the

European Schools Project Association

Crossing Borders to meet Global Educational Challenges through Innovative ICT

Co-organized by

Norway - Haugesund

March 14th -18th 2012

www.espnet.eu/esp26

ESP is the oldest network organisation in the world focussing on ICT-based innovation of education

In 1987 the European Schools Project was born.

Every year conferences have been organised for and by teachers, educators and researchers. These are working conferences in which interaction and collaboration are central. The main goal is for participants to return to their schools and start international computer supported collaborative learning projects (CSCL-projects).

Over the years thousands of teachers and students have successfully worked together on collaborative projects in many languages.

The overarching aim of ESP has been, still is, and will be: the ICT-based innovation of our indispensable social systems: SCHOOLS.

Crossing Borders to meet Global Educational Challenges through Innovative ICT

Living in an increasingly globalized world, the growth of social networking websites requires careful monitoring. As recent surveys show the awareness of cybersafety is essential for both teachers and their students. We, therefore have the responsibility to meet these new challenges in education which we are facing in the 21st century.

The focus of this conference will include

- issues surrounding the development of social networking using different mobile devices
- Web 2.0 applications (e.g. blogs, forums, wikis, video conferencing and podcasting)
- Creating educational links with other schools
- Setting up international, collaborative projects

A Working and Training Conference for and by Educators

Our 26th conference is for heads and teachers of primary, secondary, vocational and special needs' education, International and ICT coordinators, teacher trainers, educational researchers and policy makers.

Presentations and workshops

We encourage participants to contribute with their own presentations or run workshops. Please indicate during registration.

Main Themes

How to enable and encourage teachers and schools to start designing, planning and actually working with innovative ICT-based international projects

- Designing, planning and evaluation of Computer Supported Collaborative Learning (CSCL) and other innovative projects, like e-Journalism
- Teachers' professional development in international work
- Project-based learning and teaching and use of ICT

Main Activities

You will be able to

- Share best practices and projects based on Collaborative Learning and Educational use of ICT
- Set up collaborative projects through eTwinning.
- Use material from "the Image of the Other".
- Take part in workshops for the implementation/follow-up of CSCL projects
- Find partners for the development of collaborative projects
- Attend presentations which give a deeper insight into technical and human challenges that ICT presents
- Share experiences and exchange views with partners from other countries
- Acquire the latest developments in the field of interactive resources for teachers.
- Discuss issues of sustainable Life Long Learning between colleagues

DEADLINE FOR REGISTRATION
January 15th 2012
Registration opens 1st July 2011
